<b>Ημέρ. ολοκλήρωσης Πρακτικής Άσκησης</b>	15-Sep-2023
<b>Ωράριο Απασχόλησης</b>	10:00 - 18:00
<b>Τομέας/Τμήμα Απασχόλησης</b>	Business Development, Marketing
<b>Τίτλος Θέσης</b>	Customer Success Intern
<b>Περιγραφή Καθηκόντων Θέσης</b>	The intern will be responsible for identifying and developing new business opportunities for the company. This can include identifying potential customers and building relationships with them. They will also be responsible for creating and implementing strategies for increasing sales and revenue. Additionally, they may work with other departments within the company, such as marketing and product development, to ensure that the company is meeting its business goals.
<b>Κύριοι Στόχοι Πρακτικής Άσκησης</b>	To gain real-world experience on startups and the Cypriot tech ecosystem. Interns will also have the opportunity to apply the knowledge and skills they have learned in school to a professional setting. The internship will provide students with the opportunity to learn new skills, such as teamwork, communication, and problem-solving, that are valuable in any career. The internship will also allow students to determine if a particular career or industry is a good fit for them by allowing them to experience the day-to-day tasks and responsibilities of a job.

<b>Επωνυμία</b>	<b>6. <a href="#">3AeHealth LTD</a></b>
<b>Διεύθυνση</b>	Chatzigiorgaki Kornesiou, 19 Agios Pavlos, 2361, Nicosia, Cyprus
<b>Ιστοσελίδα</b>	<a href="https://www.3ahealth.com/">https://www.3ahealth.com/</a>
<b>Σελίδες σε Μέσα Κοινωνικής Δικτύωσης</b>	3AE Health LTD - LinkedIn
<b>Περιγραφή Εργασιών</b>	3AE Health Ltd (3AHealth) - <a href="http://www.3ahealth.com/">http://www.3ahealth.com/</a> , is a Cyprus-based SME that specializes in the design and development of cutting-edge, reliable, and interoperable solutions in the areas of eHealth, mHealth, healthcare data analytics, and image and video processing. The company was established in 2016, and was co-founded by a team of senior scientists bringing together significant expertise in developing innovative, intelligent, and citizen-centred solutions, emanating from decades of involvement in R&D projects at both National and European levels. 3AHealth product suite is designed around the healthcare interoperability standards and EU directives for cross-system data communication and cross-border healthcare services. 3AHealth's portfolio includes, EUDCC covid certificate platform, Thalassaemia International Federation (TIF) electronic registry, an inpatient monitoring hospital information system (also customized for COVID-19 patients), a hospital content resource management (CRM) system, and many smaller scale products across the eHealth ecosystem. Currently 3AHealth is leading the maintenance of the EUDCC platform and the development of the Cyprus National Electronic Health Record (EHR), via the project eHealth4U: Integrated National eHealth Ecosystem and is the technical leader of the H2020-MSCA RESPECT: Secure and Privacy –preserving Indoor Robotics for Healthcare Environments project.

<b>Ημέρ. ολοκλήρωσης Πρακτικής Άσκησης</b>	31-Aug-2023
<b>Ωράριο Απασχόλησης</b>	Part-time (4-6 hours per day, 20 - 30 per week)
<b>Τομέας/Τμήμα Απασχόλησης</b>	Research and development in AI, ML and Data engineering
<b>Τίτλος Θέσης</b>	Data science and machine learning internship
<b>Περιγραφή Καθηκόντων Θέσης</b>	The intern will get involved with AI, ML and data engineering tools. He will manage and implement R&D projects in Data Science and relevant ML technologies; Manage data of different volume, velocity and variety; Experiment with different ML algorithms; Explain complex data analytics results through appropriate visualizations; Follow the state-of-the-art and desire to work on different projects and technologies; Work with cross-functional teams to deliver technical R&D solutions; Implement technical and scientific deliverables (state-of-art, requirements, conceptual architecture, specifications, implementation/integration plans, prototypes, testing, etc.
<b>Κύριοι Στόχοι Πρακτικής Άσκησης</b>	Train interns in cutting edge technologies (ML, AI, Data engineering), cultivate collaboration culture with academia and students, extend collaboration with exceptional cases
<b>Ελάχιστα Απαιτούμενα Προσόντα</b>	The intern should have: <ol style="list-style-type: none"> <li>1. Degree in Computer Science, Software Engineering or related fields or have completed the 3rd year of his studies;</li> <li>2. Ability to develop extensible, testable and maintainable code using modern programming and scripting languages;</li> <li>3. Knowledge of big data technologies (e.g. Hadoop, Spark), data science tools and ML libraries (e.g. MLlib, Scikit, TensorFlow, etc.);</li> <li>4. A good understanding of semantic technologies (e.g. OWL, RDF, knowledge graphs) is desired but not essential;</li> <li>5. Ability to perform in multi-cultural environments and to deliver results in an environment that requires meeting set deadlines, fresh thinking and innovation;</li> </ol>

<b>Τομέας/Τμήμα Απασχόλησης</b>	Education Development, Product & Mechanical Design, Software & Game Development, Robots & Electronics Development, Business & Marketing Development, Graphic Design & Multimedia
<b>Τίτλος Θέσης</b>	Education Development, Product & Mechanical Design, Software & Game Development, Robots & Electronics Development, Business & Marketing Development, Graphic Design & Multimedia
<b>Περιγραφή Καθηκόντων Θέσης</b>	<p>Education Development: To develop unique lesson plans that will use various constructional sets as well as associated software that will teach kids of various ages, from preschool to high school, as these relate to Science and Technology, and according to latest pedagogical trends on STEM education. To author the supporting theory of the lesson plans in a fun and engaging way that will inspire children to learn about the technologies. To teach and run workshops for students aged 5 to 12+, also providing feedback for improvement. To carry out academic level background research on papers and the latest developments in the field, as well as competitor research and to present these to the management and other personnel in a clear and concise way. To test the company's new solutions with students, gather data, run interviews and analyze results to coauthor articles for publishing at world-renowned conferences and international magazines. Etc.</p> <p>Product &amp; Mechanical Design: Responsible for the Research, Design, Development and Implementation of DIY projects using the engino parts, 3D printer, laser cutter and other wood processing equipment that allow children from the age of 3 to 16+ to make their own technical device or toy. The developed projects would include the parts, models and lesson plans for students as well as teacher guide. Work closely with the ENGINO educational team as well as the R&amp;D</p>

	<p>people in various departments (Marketing, Product Design, Software and electronics Development, Graphics etc). Operate the 3D printing and Laser cutting and make efficient prototypes and DIY makerspace projects. Develop the work using various software, some of which are proprietary to the company such as KEIRO and some that are more generic such as TINKERCAD, MAKECODE, SCRATCH, INVENTOR, SOLIDWORKS, COREL DRAW and PHOTOSHOP. Teach and test the makerspace lessons developed to students both in-house at the ENGINO center and to schools and other locations when needed, collect data and work with the rest of the team and the University to analyze data and write reports and papers for publishing in Academic Journals.</p> <p>Software &amp; Game Development: • Design and build reusable and reliable code using UNITY3D and other platforms. Create efficient, optimized code IN C# and publish serious games and apps for Windows, Android, Linux and iOS. Maintaining and improving some of the existing projects. Continuously test, debug, profile, analyze, and optimize code on applicable platforms, ensuring the best possible performance, quality, and responsiveness of applications. Work together with all members in R&amp;D in Cyprus offices to define and maintain product requirements throughout the design stage. Will be part of the team developing software and apps such as KEIRO, ENVIRO as well as new software solutions such as eLearning, authoring tools and serious games. Etc.</p> <p>Robots &amp; Electronics Development: Design, develop, test and implement firmware &amp; hardware for our products using mostly ESP32 microprocessor. Involved for the entire life cycle of the product, from definition to delivery and ongoing product support. Work together with software and mechanical engineers to define and maintain product requirements throughout the design stage. Source hardware components and build prototypes and supervise outsourced manufacturing. etc.</p> <p>Business &amp; Marketing Development: Plan and implement the content strategy across social media platforms (primarily Instagram, Facebook, Tik Tok, Pinterest). Track and analyse key social media KPIs, etc.</p> <p>Graphic Design &amp; Multimedia: Create artworks based on a story. Create the characters that supplement toys and storytelling books. Design hand sketches and drawings that are related to stories. Design posters and stickers for our products. Working within budgets and deadlines. Short film animations &amp; movie editing. Etc.</p>
<b>Κύριοι Στόχοι Πρακτικής Άσκησης</b>	<p>The main target is to have some help in the departments while also coaching young individuals become better professionals and selecting some of them for permanent job offering if they can.</p>
<b>Ελάχιστα Απαιτούμενα Προσόντα</b>	<p>Education Development: A Bachelor's degree with a Master in any of the fields of Mathematics, Physics, Engineering and Education Science. Previous experience in teaching students will be needed of at least 4 years. Excellent command of English language is a must, both verbal and written. Knowledge of Greek language will be an advantage. Experience in Academic level research or in EU programs. Excellent communication and presentation skills. To have driving license.</p> <p>Product &amp; Mechanical Design: Degree in Industrial/Product Design or Mechanical or Electronics Engineering and/or Education Science or other related degree. Graduated at least 2 years ago, with work experience in design and manufacturing or Makerspaces as well as teaching D&amp;T. Excellent Knowledge of 3D CAD Design software, ideally Autodesk Inventor, but also Solid Works, or Similar software. Knowledge of other software such as Tinkercad, 3DS Max, Photoshop, CorelDraw and programming will be considered an advantage. Adequate expertise in 3D printing, laser cutting and prototyping hands-on projects and willingness to learn.</p> <p>Software &amp; Game Development: BSc in Computer Science, Software Engineering or any other relevant field. 4+ years of professional experience as Unity Programmer. Excellent knowledge of Unity3D, including experience with scripting,</p>

	<p>textures, animation and UI. Strong knowledge of C#. Experience with Mobile Development. Analytical approach when it comes to problem solving/debugging. Excellent communication skills. Strong organizational skills and self-disciplined to work remotely. Ability to perform under pressure.</p> <p>Robots &amp; Electronics Development: Bachelor's degree in Electronic Engineering or related field. Proficient in C or C++ programming. Knowledge and experience with Bluetooth and Wi-Fi (Desirable). Familiar with ESP32 and Cortex-M series microcontrollers (Desirable). Ability to use any lab equipment required to develop and debug prototypes. Knowledge of PCB design and manufacturing (Desirable).</p> <p>Business &amp; Marketing Development: University degree in any field, especially in Creative Writing, Mass Media/Communications, Marketing, Business or similar. Possession of creative flair with excellent writing and editing skills in English. You'll be a snappy, comfortable communicator, both in person and on paper. Self-motivated, detail-oriented, and able to work independently to meet deadlines effectively. In-depth knowledge and understanding of various social media platforms, SEO, and SEM techniques. Knowledge of applications such as Google Ads, FB Ads, and analytics, other ad serving tools such as programmatic will be considered an advantage. Specific experience on corporate and B2B accounts is also essential.</p> <p>Graphic Design &amp; Multimedia: University degree in Graphics design, Multimedia or relevant field. Appealing portfolio of related content. Ability to deliver artworks in digital format. Good knowledge of graphics and visual communication. Strong knowledge of CorelDRAW, Adobe utilities, unity, web design, video &amp; photo editing &amp; production will be considered as an advantage. Team spirit and ability to collaborate with R&amp;D departments of Engino. Dedicated to deliver content within the agreed timescales and milestones of the project.</p>

<b>Επωνυμία</b>	29. <a href="#">AAI Scientific Cultural Services Ltd.</a>
<b>Διεύθυνση</b>	Galaxias Center Office 501, 33 Arch. Makarios III Avenue, Nicosia 1065, Cyprus
<b>Ιστοσελίδα</b>	<a href="https://aaiscs.com/">https://aaiscs.com/</a>
<b>Σελίδες σε Μέσα Κοινωνικής Δικτύωσης</b>	-
<b>Περιγραφή Εργασιών</b>	<p>AAISCS focuses on basic and applied research, primarily in cognitive neuroscience and the utilization of the results in services and products using simple and widely available instrumentation. The basic research is rooted in work on theoretical and experimental methods in magnetoencephalography (MEG), which stretches in time from the late 1980s and 1990s (in UK and Germany) to setting up one of the best MEG facilities in the world, the Lab. for Human brain dynamics (LHBD-J) established in the Brain Science Institute (BSI), at RIKEN in Japan and operated from 1999 to 2009. The deliberate emphasis on pioneering basic research at LHBD-J allowed some unique experiments to be performed during its operation in the first decade of the new millennium. The expertise, tools and data accumulated in the two decades on either side of the millennium change were the pillars on which the AAISCS was founded; the laboratory with the same name in Cyprus (LHBD-C) was entrusted with the continuation of the basic research and its translation to useful services and products, mainly using electroencephalography (EEG). Some of the recent work of LHBD-C (using either MEG, or EEG or both) have made significant contributions to the understanding of sleep and its role in maintaining a neural representation of self. The intended impact includes both terrestrial and space applications. The space applications are under two contracts from the European Space Agency (ESA). These contracts have as long-term aim to help astronauts in long space missions, e.g. to Mars or the asteroids, to maintain good state of mind and achieve sustained peak performance levels. On the methodological side recent work has advanced novel ways of evaluating changes over time, for example evaluating the efficacy of interventions and comparing different types of interventions, e.g. pharmacological and non-pharmacological ones like neurofeedback. This work is part of a concerted effort promote personalized approaches to medical intervention and self-management of good mental and physical health.</p>
<b>Υπεύθυνο Άτομο Επικοινωνίας</b>	Prof. Andreas A. Ioannides

<b>Ημέρ. έναρξης Πρακτικής Άσκησης</b>	22-May-2023
<b>Ημέρ. ολοκλήρωσης Πρακτικής Άσκησης</b>	23-Sep-2023
<b>Ωράριο Απασχόλησης</b>	Working Hours are normally 9 am to 5 pm, but flexible timetable is also possible, if it fits the project requirements and there is operational capacity for support, supervision and evaluation.
<b>Τομέας/Τμήμα Απασχόλησης</b>	The wide range of activities listed under Description of Activity (e.g. Sector/ Field) directly involved in the AAISCS basic and applied research, can benefit from good knowledge and expertise in a wide range of traditional fields which include: neuroscience, medicine, physics and engineering, computer science and data sciences, neurofeedback/ neuromodulation, learning, sleep and a wide range of applied mathematics including inverse problem, signal processing, statistics, clustering and graph theory. The ideal candidate will have expertise in one or more of these areas

	and it is desirable that s/he also has programming skills with strong mathematical background or experimental methods (including microprocessors) which can be combined to target a specific goal, e.g. the design, implementation or use of biological phantoms.
<b>Τίτλος Θέσης</b>	Either Technical Assistant (TA) or Research Assistant (RA)
<b>Περιγραφή Καθηκόντων Θέσης</b>	For a TA position the work will be restricted to acquiring skills in analysis and/or experimental work with EEG and MEG, behavioral tests and participate in applications using these skills to ongoing work in the laboratory. For a RA position the candidate is expected to have already high level of skill or training in one of the areas described above (if possible before the beginning of the internship, or undergo an intensive training in such an area which must be related to documented evidence (e.g. attaining high marks in relevant university courses or work/project) and/or studying of published work related to the intended project or training in experimental techniques. Ideally some of this training will start before the start of the project. It is possible for an internship started as a TA position to change during the internship into an RA position and the reverse.
<b>Κύριοι Στόχοι Πρακτικής Άσκησης</b>	For the internee: The internees will gain useful skills and knowledge which could greatly amplify the effectiveness, usefulness and marketability of their university education. For internees interested in a career with AAISCS the internship will expose them to the work and future employment opportunities and conditions at AAISCS. For AAISCS: Getting to know future employees/collaborators and identifying and advising likely candidates of actions that they can take in their studies which will make them well-qualified for rewarding and fulfilling work at AAISCS with considerably higher remuneration than if they were to be employed without previous relevant work experience. For internees performing exceptionally well during the allocated 30 working days an extension of the internship may be offered with the additional period compensated by AAISCS. Sustained exceptional work during the summer internship may also continue as long-term involvement in research which is expected to lead to important publications in high impact, peer reviewed journals.
<b>Ελάχιστα Απαιτούμενα Προσόντα</b>	Minimum requirements are: good command of English language, training and knowledge in one or more relevant areas (as these are described elsewhere in this announcement), willingness to go into new areas and work hard (otherwise little can be gained within 30 working days) and ability to work under own initiative and as a member of a team. In addition, a successful candidate is expected to have good knowledge and appetite to go deeper in one or more of the (many) field/areas of AAISCS research. People with interest in science but following a degree in other areas could also apply if they are interested either in applying their writing skill to writing articles about the recent scientific achievements of AAISCS for the general public or investigating commercial opportunities and/or issues related to intellectual property rights related to results of the translational research of AAISCS. Candidate internees are encouraged to read AAISCS web pages and identify in their applications specific areas that they are particularly interested in. Candidate internees are also welcome to suggest projects that augment the scope of ongoing AAISCS work and/or projects which use AAISCS capabilities in novel ways in new areas, for example social sciences, economics and art, which they study in their universities. Finally, the internship could be planned as preparation for ambitious projects the internees may undertake in the future at their universities as part of their degree courses. For the last

	scenario approval must be obtained in advance from their institutions and ideally such project should be planned as a collaboration between AAISCS and the internee's university.

<b>Περιγραφή Εργασιών</b>	<p>Η πρακτική DERGON διερευνά τη διασταύρωση μεταξύ του κοινού (δήμιος-dēmiōs, ) και της δημιουργίας (ἔργον-érgon) στο γόνιμο έδαφος της ψηφιακής μας εποχής για τη δημιουργία αντικειμένων και χώρων που δίνουν προτεραιότητα σε θετικό κοινωνικό αντίκτυπο. Η πρακτική είναι βυθισμένη στην αλληλεπίδραση των υλικών και της κατασκευής η οποία διερευνά τις δυνατότητες ψηφιακών εργαλείων όπως η τρισδιάστατη εκτύπωση με την χρήση ρομποτικού βραχίονα για την κατασκευή των τελικών αντικειμένων. Η περιέργεια για επίλυση προβλημάτων ενθάρρυνε την εταιρία να διερευνήσει κοινωνικά ζητήματα όπως τα απορρίμματα πλαστικών και να αντιστρέψει τον αρνητικό αντίκτυπό τους δίνοντας νέα ζωή σε πεταμένα αντικείμενα όπως cd, πλαστικά μιας χρήσης και ηλεκτρικές συσκευές για τη δημιουργία αντικειμένων όπως έπιπλα και αστικά αντικείμενα. Εργαζόμενοι ως πρακτικοί ψηφιακοί δημιουργοί, το κίνητρό μας είναι να σχεδιάζουμε ενδιαφέροντα αντικείμενα και αντικείμενα που αγκαλιάζουν και γιορτάζουν την πολυπλοκότητα του πραγματικού κόσμου.</p>

<b>Επωνυμία</b>	42. <a href="#">SIGINT SOLUTIONS LTD</a>
<b>Διεύθυνση</b>	Demokedous10-12, 2311 Nicosia
<b>Ιστοσελίδα</b>	<a href="http://www.sigintsolutions.com">www.sigintsolutions.com</a>
<b>Σελίδες σε Μέσα Κοινωνικής Δικτύωσης</b>	<a href="https://www.facebook.com/SigintSolutionsLtd/">https://www.facebook.com/SigintSolutionsLtd/</a> <a href="https://cy.linkedin.com/company/sigint-solutions-ltd">https://cy.linkedin.com/company/sigint-solutions-ltd</a>
<b>Περιγραφή Εργασιών</b>	<p>SIGINT is an IT and Telecommunication Organization (SME) that specializes mostly in wireless and networking applications, covering Telecom hardware and software development and integration activities. SIGINT's core research competencies are in layers 1-3 of the OSI model. Through its expertise and knowledge, SIGINT develops cutting-edge solutions and transfers them to the industry. Its activities include the development of communication simulators, emulators, network testbeds, WSN/IoT hardware and software platforms and crisis management platforms. In this scope, SIGINT is the original vendor of TruNET Wireless, a 3D wireless planning simulator, ORION crisis management platform, ARGUS IoT series hardware equipment, as well as a flexible IoT educational suite dubbed IoT-4ALL, dedicated to introducing IoT and Robotics programming to the youth.</p> <p>SIGINT's Radio/EMF measurement laboratory is structured as per the ISO17025 directives and supports the provided products, services and the experimental platforms' validation and testing activities of the company. It is fully equipped with telecommunication calibrated equipment. Equipment includes radio wireless measurement systems that cover a wide range of frequencies and systems.</p> <p>In the R&amp;D and network area, SIGINT's competency is demonstrated by its successful, long term research record in R&amp;D projects from FP6-FP7, EUREKA CELTIC and national calls. EU Projects include: 4GOPEN (EUROSTARS), UNITE (FP6), FUTON (FP7), WHERE (FP7), WHERE2 (FP7), LOOP (CELTIC/EU), MOBILIA (CELTIC/EU), ICARUS (CELTIC/EU), C2POWER (FP7), COGEU(FP7), SONNET (Horizon/Marie Curie). National Research Projects (Research Promotion Foundation) include, ASPIDA, MOTIF, LOCME, I-LOCON, DAROSA, 3PRO TROODOS, TruNET (Ministry of Commerce) and MULTISENSE.</p> <p>For this specific call the potential candidate will be employed in the R&amp;D department of the company and shall be involved in the MULTISENSE project focusing in the software development activities of multidomain wireless threat detection sensors.</p>

<b>Τομέας/Τμήμα Απασχόλησης</b>	(1) Research & Development (2) Software Development / Testing (3) Marketing
<b>Τίτλος Θέσης</b>	(1) Machine Learning Intern (2) QA and Testing intern (3) Social Media Content Creator Intern
<b>Περιγραφή Καθηκόντων Θέσης</b>	(1) At Malloc, we are harnessing the power of machine learning to detect spyware and protect user's privacy based on various indicators. We are looking for an intern to join our team and help us analyse data, develop and test machine learning models. The ideal candidate will have experience with Python and TensorFlow. He or she will be able to work independently and be comfortable with ambiguity. The intern will work closely with the engineering team to develop data collection, data analysis components and test new machine learning models. (2) - Development of scripted automated assurance tests - Writing and executing test cases to ensure software meets specified requirements. - Identifying and reporting software bugs and issues. - Collaborating with development teams to help resolve bugs and issues. - Helping with user acceptance testing. (3) - Create content for IG, TikTok and Youtube channels of Malloc. - Create and edit videos and images.

<p><b>Κύριοι Στόχοι Πρακτικής Άσκησης</b></p>	<p>(1) - Understand the basics of machine learning algorithms and models          - Develop an understanding of how to pre-process data for machine learning          - Understand the basics of feature engineering          - Develop data collection and data analysis tools.          - Train, test, and validate simple machine learning models using existing software packages          (2) To gain hands-on experience in the scripting and development of automated tests using Python for the monitoring of cloud infrastructure and the deployment of new features.          (3) This role is ideal for students interested in a part-time position to gain experience in working in a high-paced tech startup. You'll experience how working in an early-stage startup is, and apply your marketing skills in creating content to establish a community for privacy-minded people. You will create content for TikTok, Youtube and IG.</p>
<p><b>Ελάχιστα Απαιτούμενα Προσόντα</b></p>	<p>(1) - Working towards a degree in computer science, mathematics, or related field          - Experience with programming languages such as Python, Java.          - Experience with machine learning libraries such as TensorFlow, Keras, PyTorch, etc.          - Ability to work independently and take initiative          - Excellent problem-solving skills          - Strong written and verbal communication skills          (2) knowledge of python and basic testing principles. computing/engineering related studies.          (3) - Excellent usage of TikTok, IG &amp; Youtube          - Video editing skills (any program)          - Proficient in English</p>

Περιγραφή Καθηκόντων Θέσης	<p>Internship objectives and job description:</p> <p>The research project will last for a month and will be conducted in partnership with world-class industry experts and academics. As an intern, you will have the opportunity to work directly with Covve's team of experts, including the product team and research &amp; education team, to gain valuable insights and experience in the field.</p> <p>The results of the research will be published via our channels and will provide valuable insights into the relationship dynamics among professionals in Cyprus. This is a unique opportunity to make a significant impact on the industry and contribute to our understanding of the impact of professional relationships on productivity.</p> <p><b>Psychologist/Sociologist/Anthropologist Internship Job Description</b></p> <p><u>Responsibilities:</u></p> <p>Design and implement data collection methods such as surveys, interviews, and focus groups.</p> <p>Analyze qualitative data to understand the dynamics of professional relationships in Cyprus.</p> <p>Conduct a literature review to gather information on existing research in the field.</p> <p>Contribute to report writing by summarizing the findings and presenting recommendations based on the research.</p> <p>Assist with administrative tasks as needed.</p>

	<p><b>Minimum Requirements:</b>          Currently enrolled in a PhD program in psychology, sociology, or anthropology.          Strong knowledge of qualitative research methods and data analysis techniques.          Excellent writing and communication skills.          Ability to work independently and as part of a team.          Familiarity with Microsoft Office Suite and data analysis software such as SPSS, R, or Stata.</p> <p><b>Statistician Internship Job Description</b></p> <p><b>Responsibilities:</b>          Analyze quantitative data using appropriate statistical methods.          Run statistical tests on the data collected to identify patterns and trends.          Contribute to report writing by presenting the findings in a clear and concise manner.          Assist with administrative tasks as needed.</p> <p><b>Minimum Requirements:</b>          Currently enrolled in a PhD program in statistics or a related field.          Strong knowledge of statistical analysis methods and software such as SPSS, R, or Stata.          Excellent writing and communication skills.          Ability to work independently and as part of a team.          Familiarity with Microsoft Office Suite.</p>
<p><b>Κύριοι Στόχοι Πρακτικής Άσκησης</b></p>	<p>Enhancing the Productivity of Professionals in Cyprus: A Study of Relationship Dynamics in the Workplace</p> <p>Covee, a globally recognized leader in personal CRM tools, is committed to delivering innovative solutions that simplify professional networking and relationship building. Our clients, ranging from multinational corporations such as Google and Deloitte, to industry leaders like Delta Airlines and Accenture, trust our products to enhance their professional connections.</p> <p>As part of our ongoing efforts to evolve our offerings, we have partnered with leading industry experts and academics to delve into the science of professional relationships and connection dynamics in the workplace. Our partners include career strategist Doug Lester, advisor to Harvard Business School and Fortune 100 companies, and Professor Robin Dunbar, renowned evolutionary psychologist and Oxford academic with numerous publications to his credit.</p> <p>Our research proposal aims to study the unique relationship dynamics among professionals in Cyprus, a country that deviates from the European trend of remote work. In Cyprus, professionals tend to interact in person, with a preference for social interaction in the workplace, and go to the office instead of working remotely. We seek to determine if this 'office-centric' approach leads to higher productivity compared to countries that favor remote work. Our findings will be compared to existing literature, such as Professor Dunbar's research on the positive impact of in-person professional relationships on work environment and productivity.</p> <p>The implications of our research can have a significant impact on the industry and professionals worldwide. If our findings support the theory that in-person professional relationships drive higher productivity, it could encourage organizations to prioritize in-person interaction and collaboration in the workplace. Additionally, our research could provide valuable insights for professionals seeking to build stronger, more productive relationships in their careers.</p>

	<p>The data and insights generated from our research can be used to further advance the field of professional relationship dynamics and be applied to the development of new products and services that enhance professional connections and relationships. Ultimately, our research has the potential to transform the way professionals approach relationship building and networking, leading to improved work environments and increased productivity.</p>
<b>Ελάχιστα Απαιτούμενα Προσόντα</b>	<p><b>Psychologist/Sociologist/Anthropologist Internship Job Description</b>  <u>Minimum Requirements:</u>          Currently enrolled in a PhD program in psychology, sociology, or anthropology.          Strong knowledge of qualitative research methods and data analysis techniques.          Excellent writing and communication skills.          Ability to work independently and as part of a team.          Familiarity with Microsoft Office Suite and data analysis software such as SPSS, R, or Stata.</p> <p><b>Statistician Internship Job Description</b>          Currently enrolled in a PhD program in statistics or a related field. <b>Τομέας/Τμήμα Απασχόλησης</b>	R&D
<b>Τίτλος Θέσης</b>	R&D Intern
<b>Περιγραφή Καθηκόντων Θέσης</b>	The student will work with a team of experienced engineers on projects that fall within the domains of haptic interfaces (i.e. VR/VR Haptics, smartphone haptics, etc.) and human-robot interaction (i.e. wearable robots). The tasks assigned to the intern will be related to one of the following topics: 1. Electronics and embedded programming - interfacing hardware and software (COTS or custom-made PCBs). 2. Mechanical design, simulation, dynamics and control and/or industrial design. 3. Software (i.e. API) and/or app development (Html, Unity, UI such as Compose, etc.). 4. Signal processing for acoustics with the use of C and/or Python, MATLAB/GNU Octave, etc. 5. Control System Simulation (i.e. MATLAB/GNU Octave) and Design for DC Motors and/or IMU programming for motion tracking (i.e. in C or Python). 6. Industrial Design of wearables. 7. Other relevant tasks.
<b>Κύριοι Στόχοι Πρακτικής Άσκησης</b>	1. Develop multidisciplinary-team-integration abilities. 2. Understand agile management requirements for product development. 3. Develop self-initiative and personal leadership abilities and time-management skills. 4. Implement theoretical and academic knowledge through hands-on work for innovative projects.
<b>Ελάχιστα Απαιτούμενα Προσόντα</b>	The candidate must be a Student (graduate or advanced undergraduate) in Electrical Engineering/Mechanical Engineering/Computer Engineering/Computer science/Industrial Design or a field relevant to the duties of the post, must have excellent knowledge of English (reading, writing) and, any or a combination of the following: Excellent programming skills (i.e., C++, MATLAB, Python, etc.). Embedded programming knowledge for COTS electronics such as Arduino, RUSBERY PI, etc. Familiarity with the fundamentals of PCB design and programming. API development or programming skills (i.e. for Android, Unity, XR/VR, etc.). Excellent knowledge of principles of industrial design for wearables (additive manufacturing skills is a plus). Excellent theoretical knowledge of either signal processing, dynamics and control, acoustics, etc.

<b>Περιγραφή Εργασιών</b>	<p>Ask Wire provides the infrastructure on which real estate related financial products and services are developed. Each property is different, thus further investigation is required to customise a product or service. Ask Wire is building the digital profile of all properties across Europe, allowing users to assess multiple properties or tailor their products and services to a specific property, unlock automation of standardised processes, and facilitate online transactions. This facilitates banks, insurance companies, real estate investors, retailers, and others meet consumer demand for online transactions, develop new sales channels, and comply with regulatory requirements. Property profiles and models are made available through an array of APIs (DaaS) and software interfaces (SaaS). Ask Wire also works alongside clients to structure and reorganise client-facing processes, develop new products and services, and develop real estate strategies. "</p>
