Subject: GreenResIsland - EU Horizon Europe Project Partner Search

Dear Cyprus Representatives,

This is Sascha Düerkop from the Fraunhofer Institute for Technological Trend Analysis (Fraunhofer INT) in Germany. We are a leading European research organisation with decades of experience in leading and contributing to projects across Europe. We are contacting you today, as we would love to innovate for, with and thanks to you, in making crucial steps towards climate-neutrality.

Our intention is to understand the needs of your island community and innovate together, to provide them in a sustainable way. We would like to collaborate in making your island and its society a role model for the green transition of Europe. In a more extensive form, please find attached a project brief for the planned project "GreenResIsland".

As a first step on our collaborative journey, we would like to get to know you better and identify the topics you are most interested in. To do so, we thus kindly ask you to fill out the following brief application form to become part of the project:

<https://ec.europa.eu/eusurvey/runner/HorizonEuropeIslands>

Based on the feedback and results we receive, we will select the islands we will work with.

Please feel free to forward the survey to your peers or colleagues on other rural islands in Europe. While the survey is available in multiple languages (you can choose a language at the top right corner), translations may be automatically generated and thus not perfect.

We are looking forward to hearing back from you, via the survey or, if you have any questions, by mail. We further hope to work closely with and for you in the years to come.

Best wishes,
Sascha
