Role in the project:		
<input checked="" type="checkbox"/> Research	<input checked="" type="checkbox"/> Training	<input checked="" type="checkbox"/> Dissemination
<input checked="" type="checkbox"/> Technology Development	<input type="checkbox"/> Other	
Project idea: Support for the purposeful and pedagogical use of emerging technologies, including applications of artificial intelligence (AI), virtual reality (VR), augmented reality (AR) and robotics in education and training, in order to foster 21st century skills such as communication, collaboration, digital literacy, critical as well as design thinking and creativity.		
Project description: Project aims to identify barriers, enablers and framework conditions for successfully embedding emerging technologies in educational practices, including necessary innovation skills for teachers. The project will actively involve educators in shaping and co-designing education and training technological products and tools. It will also look at the positive and negative effects of digital technologies on learning, educational outcomes and basic skills. This will be done in sustainable and ecologically responsible ways, addressing accessibility in an inclusive manner, and providing for the gradual move from small-scale projects and pilots to mainstream implementation and adoption.		
Already experienced as a Coordinator: <input checked="" type="checkbox"/> Already experienced as a Partner: <input checked="" type="checkbox"/>
